- Multiples types of flows may be controlled simultaneously.
- Typical applications are data centers, secure production zones, command & control rooms, research & development laboratories, airports and elevators
- The SMACS can be easily interfaced with any access control solution.
- Worldwide customer references.

**ASIS EUROPE 2017, Stand D6, March 29<sup>th</sup> to 31<sup>st</sup> 2017**

FASTCOM Technology SA, a leading company in intelligent anti-tailgating solutions, presents its SMACS product line at ASIS EUROPE 2017. For more than 15 years, the SMACS solutions have been preventing tailgating and piggybacking in numerous domains worldwide. Typical applications are data centers, finance, secure production zones and airports. Every day, leading companies are using SMACS to preserve their security.

The SMACS products line is a complete portfolio of anti-tailgating solutions that can manage simultaneously different types of flows such as people and material.

Functionalities such anti-tailgating, vacuity check and user guidance can be aligned to the business processes of the customer. Similarly, the access modes can be aligned on specific needs. Typical examples are asymmetrical entry processes and the implementation of the "4 eyes" principle.

The SMACS can be implemented in existing infrastructure without major construction work. Any room may be transformed into a high-security airlock. The SMACS can be easily interfaced with any access controls solutions and are able to perform the door management.

*"For more than 15 years, the SMACS solutions setting the reference to put in place multi-flow access control solutions."*
